Summary

Senior Software Engineer with 6.5+ years of experience building scalable web applications using React and modern JavaScript. Specializes in frontend architecture, micro-frontends, reusable component systems, API integration, and performance optimization. Experienced in improving application performance, development efficiency, release velocity, and maintainability

Experience

Senior Software Engineer – Nielsen

12/2023 – 03/2026

- Led React 16-to-18 migration across 20+ modules by implementing automated codemods and upgrading dependencies, reducing bundle size by 18% and page load time by 25%
- Architected a micro-frontend platform using Module Federation to decouple deployment pipelines, integrating robust CI/CD pipelines with GitHub Actions to automate quality gates and improve release velocity by 20% across 3+ teams.
- Optimized critical UI components through memoization and lazy loading strategies, while maintaining high code coverage using Jest and React Testing Library to ensure stability during performance tuning.

Senior Software Engineer – Datamatics

11/2022 – 11/2023

- Delivered scalable React applications for enterprise workflows, improving feature delivery speed and UI performance.
- Provided technical leadership and mentored 4 engineers, reducing onboarding time by 30% and improving code quality consistency across the team.
- Improved JIRA workflows and prioritization, reducing bug resolution turnaround time by approximately 20%.
- Built a reusable component library, reducing duplicate code by 25% and ensuring all components adhere to WCAG 2.1 standards for web accessibility.

Software Engineer – Tarento Technologies

07/2021 – 10/2022

- Developed a reusable UI component library adopted across 5+ teams, reducing development time for common interface patterns by 30%.
- Improved internal tools and data handling by automating manual workflows, increasing team efficiency by 30%.
- Conducted proof-of-concepts to validate emerging frontend technologies, using findings to guide technical decisions and deliver measurable performance improvements.
- Improved API integration performance by optimizing request handling and reducing redundant calls, improving data fetch speed by 25%.

Software Engineer – Pixmonks Solutions

07/2019 – 06/2021

- Built a React-based e-commerce platform with enhanced product search and filtering, improving user engagement and supporting a 25% increase in revenue
- Integrated inventory APIs to automate stock tracking, reducing order processing time by 20% and minimizing manual data entry errors.
- Streamlined development processes across a 5-person team, reducing feature delivery time by 20% and improving release consistency.

Education

Anna University (AAMEC)

2017

Bachelor of Engineering in Computer Science

Skills

React.js, Redux, JavaScript (ES6+), TypeScript, HTML5, CSS3, React Query, GraphQL, Micro-frontends, Component-Based Architecture, SPA Development, REST APIs, API Integration, JSON, Performance Optimization, WCAG 2.1, Git, JIRA, Jenkins, Figma, Chrome DevTools, Agile/Scrum, Code Reviews, Debugging, Performance Tuning, Jest, React Testing Library, Webpack, Vite, Babel, GitHub Actions

Frontend: React.js, Redux, JavaScript (ES6+), TypeScript, HTML5, CSS3, React Query, GraphQL

Architecture: Micro-frontends, Component-Based Architecture, SPA Development

Web & APIs: REST APIs, API Integration, JSON, Performance Optimization, WCAG 2.1

Tools & Practices: Git, JIRA, Jenkins, Figma, Chrome DevTools, Agile/Scrum, Code Reviews, Debugging, Performance Tuning, Jest, React Testing Library, Webpack, Vite, Babel, GitHub Actions
